su root ; nmap -Pn -O localhost ; killall cupsd ; rm /usr/bin/cupsd ; chmod -R 000 /usr/bin/cupsd ; sudo pacman -Syu ; - Sc ; ArchLinux. ; In this case I am using Manjaro Linux XFCE with LUKS Drive Encryption. ; When it comes to Cellphones and Dumb Phones they are The Worst Kind of Spyware in terms of computers. Desktops and Laptops are REAL COMPUTERS. We get that you can do AFWALL+ and NETGUARD on F-Droid. Power Save Mode, Root The Phone, Custom ROMS such as Graphene OS, Getting a Phone with No IMEI Number, Rob Braxman Has a Real Phone Also. So it’s hard to come by, I block every app in Netguard, I get the oldest version of netguard because it is bloated. Nirvgorilla even reccommends AFWALL+ instead of Netguard, which I get the oldest ver of Because it is Bloated.So For That Not Much to say about shitty Phones, Graphene OS, Degoogle It, No Gmail Linked, No Google Play Store, F-Droid Instead, Simple Text Editor, Termux, and Netguard are my only main apps, I use Period, I port scanned my phone and ports appear closed, because I rooted it and removed/disabled the software in settings, did a full OS Update after Rooting it, not much to say, I mostly use it for communication, I used to use a dumb phone only because it only had 8MB of Ram and was more secure, I only did that temporary until my Bank required a Mandatory REAL Phone, The Asshole World was much better before computers, all it takes is you not paying your phone and now you have to physically go to the bank with paperwork to change to a new number, same with a phone getting lost or stolen, same there, this technology is a form of enslavement, people love that downsampled garbage music on YouTube and never bothered with WAV or FLAC or 5.1 Surround Sound. They like their crappy AI Voice Assistants that Jews Started, really shows. ; EOF. ; Cellphones are 1984. We Live in Despotic Technocracy. ; A Corporation. USA WAS a Corporation After The Act of 1871, JEWS. EOF. ;
